# Programming Lab Part 1 Instructions

## Assignment Instructions:

https://github.com/kcg295/docs/blob/master/EducationalAssignments/ABStoragePartOne.md

## Important:

1. Your security layer should produce no output. If it does, it will fail the autograder.

2. Remember that filenames can only contain lower case letters and numbers.

3. Your reference monitor must be named `reference_monitor_netid.r2py` Any other names will not work with the autograder.

4. If the autograder performs weirdly, please let us know in the discussion boards.
